

Key Features

• Highly Expandable:

Up to 6 additional monitors can be connected to the main monitor using a combination of 7-inch wired monitors and 1.8-inch wireless monitors (However, the maximum possible number of 7-inch wired monitors is 3). In addition, PBX connectivity is also supported.

• **Wireless Monitor:** Using the wireless monitor, check visitors and respond promptly from the living room, kitchen and elsewhere in the home even while you are doing something else. Up to 6 wireless monitors connectable. Max wireless range is 100 m with no obstacles. You can add on repeaters to expand the range. Up to 2 wireless repeaters connectable.

• **7-inch Screen:** The main monitor and extension monitor have a 7-inch wide screen that offers easy viewing of wide vertical and horizontal views.

• **Voice Change Function:** This function makes woman's voice (higher keys) sounds like a man's (lower keys).

• Electric Lock Release Support:

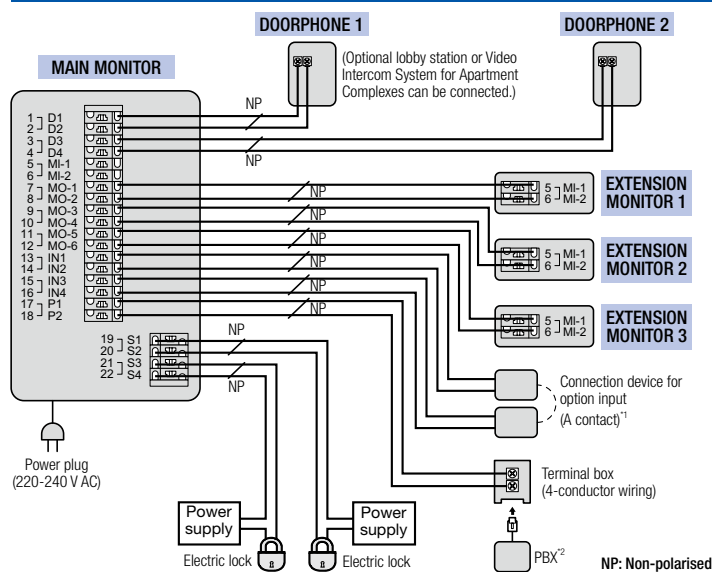

The electric locks can be easily and quickly released using monitors (wired or wireless) from anywhere in the house.

• **Picture Recording Function:** The main monitor and extension monitor can record doorphone images from up to 50 doorphone calls or monitoring sessions. (up to 8 still images per visitor/session)

• Night Vision with LED lights (illumination lamp):

Door station is equipped with LED lights (illumination lamp). It enables the colour display of visitors at a distance of about 50 cm at night.

Wiring Schematic Diagram

Wire type and length

Wiring run	Wire type ⁴		
	Diameter		Length (Max.)
Doorphone –	φ 0.65 mm	22 AWG	100 m
Main monitor –	φ 1.0 mm	18 AWG	130 m
Extension monitor ⁵	φ 0.5 mm	CAT 5	50 m
Main monitor – Electric lock ⁶	φ 0.5 mm - φ 1.2 mm (24 AWG - 17 AWG)		According to specification of connected device.
Main monitor – Connection device for option input (A contact) ⁶	φ 0.5 mm - φ 1.2 mm (24 AWG - 17 AWG)		According to specification of connected device.
Main monitor – PBX	φ 0.65 mm	CAT 3 or 22 AWG	100 m

⁴ Type: Single-pair cable with outer sheath (jacket)

Conductor: Copper solid

• A certified power supply wiring has to be used with this equipment. The relevant national installation and/or equipment regulations shall be considered. A certified power supply wiring not lighter than ordinary polyvinyl chloride flexible wiring according to IEC 60227 shall be used.

⁵ When an extension monitor is used, make sure that the total wiring length from the doorphone to the main monitor and then to the extension monitor, is within about 100 m.

⁶ When using an electric lock or a connection device for option input (A contact), select a device that meets the following guidelines:

- Electric lock connection terminal (S1/S2, S3/S4):
 - N/O dry closure contact
 - 30 V AC (1 A)/24 V DC (1 A) or lower
- Connection device for option input (A contact) terminal (IN1/IN2/IN3/IN4):
 - Input method: No-voltage contact
 - Open-circuit voltage between terminals: DC 7 V or less
 - Detection definite time: 0.1 seconds or more
 - Short-circuit between terminals: 5 mA or less
 - Resistance value: make: 500 Ω or less, break: 15 KΩ or more

¹ Connection devices for option input (A contact) can be used when a VL-V900 and VL-V700 series Video Intercom System for Apartment Complexes is used.

- Make sure to connect emergency terminals to the IN1/IN2 terminals.

- Make sure to connect doorbells to the IN3/IN4 terminals. A doorbell and doorphone 2 cannot be used together.

² Connectable PBX Model Numbers: KX-TDA30/100/100D/200/600 series, KX-TDE100/200/600 series, KX-NS300/500/700/1000 series

Please consult your dealer when connecting with a PBX.

Accessory Information

For the Sub Monitor: AC adaptor × 1, Rechargeable battery × 1, Charger × 1

For the Door Station: Screw (3.8 mm × 20 mm) × 2

For the Main Monitor Station/Extension Monitor: Mounting bracket × 1, Screw (4 mm × 16 mm) × 2

*1 When sub monitors and extension monitors are used together, a total of up to 6 sub monitors and extension monitors can be registered.

*2 Including AC cord. The weight of the AC cord differs depending on the region.

*3 Water resistance is only assured if the doorphone is installed correctly according to the instructions in the Installation Guide, and appropriate water protection measures are taken.

Installing the Doorphone

Installing the Main Monitor/Extension Monitor

Important

- Safety Precaution: carefully read the operating instructions and installation manual before using this product.

- The actual product may vary slightly from photograph.
- Weights and dimensions are approximate.
- Design and Specifications are subject to change without notice.
- These products may be subject to export control regulations.

DISTRIBUTED BY :

Panasonic[®]

Key Features

- Sophisticated Design:** Touch sensor keys are used in the monitor, achieving a fully flat design for our thinnest* model yet. You can select from silver or white. Particular attention has been paid to the materials and coatings used for the surface of the doorphone, resulting in a gently curved, metallic-looking design. Also, the optional mount box can be used to install the door inside the wall, reducing the distance between the front surface of the doorphone and the wall even further.
- Easy-to-use:** A 1.3 M pixel image sensor is used in the doorphone to dramatically improve image quality. Furthermore, the "bell" indicator on the call button illuminates so visitors immediately know where to press even in dark environments. A dedicated E-lock release key is placed on the front of the monitor and a volume adjustment key is placed on the side, making it easy to operate while talking.
- Highly Expandable:** Up to 3 wide monitors (7-inch) can be connected to the main monitor. In addition, PBX connectivity is also supported.
- 7-inch Screen:** The main monitor and extension monitor have a 7-inch wide screen that offers easy viewing of wide vertical and horizontal views.
- Voice Change Function:** This unique safety feature lowers the voice heard at the doorphone so that a female's voice sounds like a male's.
- Electric Lock Release Support for Gate:** The gate or door lock can be easily and quickly released using monitors.
- Picture Recording :** The main monitor and extension monitor can record doorphone images from up to 50 doorphone calls or monitoring sessions.
- Night Vision with:** Doorphone is equipped with LED lights (illumination lamp). It enables the colour display of visitors at a distance of about 50 cm at night.

* The thinnest intercom with built-in power supply produced by Panasonic.

Wiring Schematic Diagram

*1 When you use an additional doorphone, the maximum number of the electric locks that can be connected to the doorphone depends on the type of doorphone. Consult your dealer for further information.

For VL-V554 users:
- The electric lock can also be connected to the S1/S2 terminals of the doorphone.

*2 Connection devices for option input (A contact)

- Make sure to connect doorbells to the IN3/IN4 terminals. A doorbell and doorphone 2 cannot be used together.
- When a VL-V901 and VL-V700 series Video Intercom System for Apartment Complexes is used, emergency terminals can be used. Make sure to connect emergency terminals to the IN1/IN2 terminals.

Video Intercom System

See and Talk from Wherever* You Are

See, Listen and Record Your Way to Greater Security for Your Family.

VL-SVN511

Smartphone Connect : You can use your smartphone or tablet as a sub monitor to respond to visitors and unlock electric locks no matter where you are in the home. You can also monitor doorphone images when you want to check the door entrance. Maximum of 4 supported smartphones/tablets can be connected.

E-mail Notification : The main monitor can send e-mail with a time stamp and image of visitors to e-mail addresses registered in advance, enabling you to check who has visited when you are outside the house (even when you are overseas). When commercially available sensors (such as a fire alarm, calling button, etc.) are connected to the main monitor, you can receive notifications.

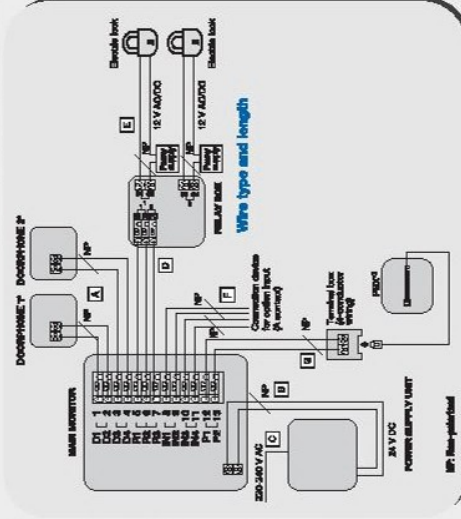

Electric Lock Release Support : The gate or door lock can be easily and quickly unlocked with either the main monitor or a mobile device such as a smartphone/tablet, even from the second floor of the house.

Picture Recording : The Main Monitor records the images of up to 400 (50 visitors, 8 shots per visitor).

Voice Changer Function : This function makes woman's voice (higher keys) sounds like a man's (lower keys).

Night Vision : Door Station is equipped with LED Lights (Illumination Lamp). It enables the colour display of visitors at a distance of about 50 cm at night.

Product Cost - Rs. 32,999

Premium 7 inch Large LCD

It provides clear and crisp image and lets you identify the visitor easily

High System Expandability

Up to 3 additional monitors can be connected in the system

Features:

- Up to 4 indoor monitors and 2 door stations supported
- Possibility of CCTV camera integration (analog system)
- Possibility of integration of sensors and detectors
- 7" Flat screen LCD TFT monitor
- Illumination: 0.1 LUX
- View angle: 120° wide angle
- Camera resolution: 700 TV lines, CMOS lens
- Volume & contrast controls
- Brightness/color/talk volume adjustable
- Video recording or snapshot available
- Built-in memory for about 120 images
- Extendable storage up to 32GB SD card
- IP 55 rated (water-proofing)

**Panasonic Premium VDP
at an affordable price**

MRP:
Rs. 9,999/-

**Exclusive Model
for Project Orders
(Large Installations)**

Snapshot or video recording

Built in memory of 120 images
(expandable up to 32GB with SD Card)

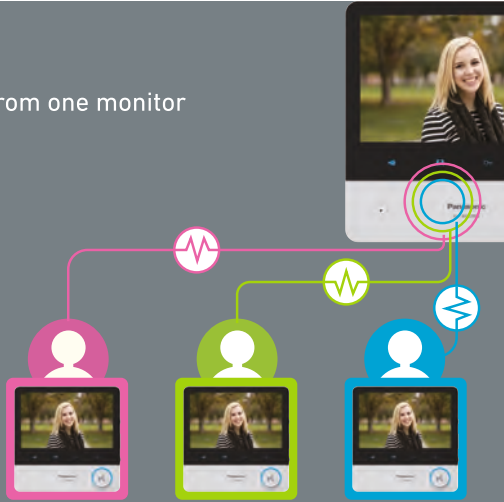

Night Vision

Image Capture at 0.1 Lux with IR LED.

Intercom Call

Possibility of calling from one monitor to the other.

IP Rating

The Door station is rated IP 55.

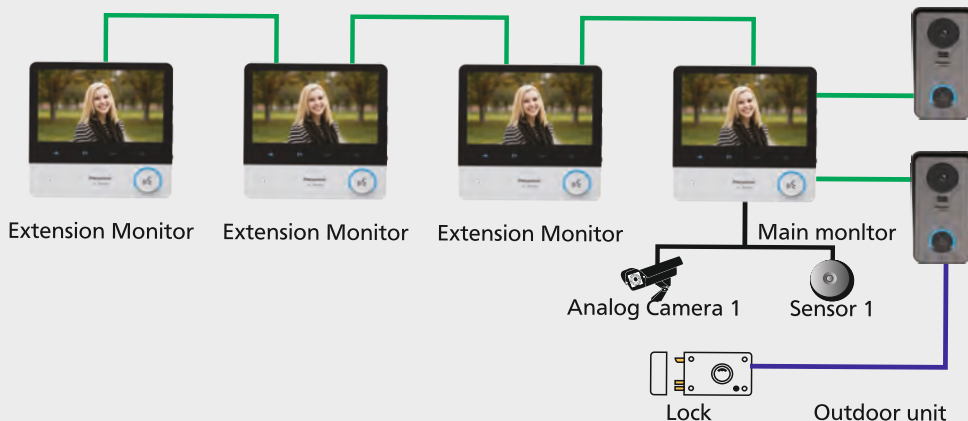

Specifications

Main monitor (VL-MA70SX)

Power source	DC 12 V 1 A, 50/60 Hz
Power consumption	Standby: < 2.0 W During operation: < 5.0 W
Dimensions (cm) (L x W x H)	Approx. 18.0 x 18.1 x 1.9 (excluding protruding sections)
Mass (weight)	approx. 380 g
Operating environment	Ambient temperature: approx. -20°C to +50 °C Relative humidity (non-condensing): 10% to 90%
Display	Approx. 17.8 cm (7.0 inches wide colour display)
Talking method	Hands-free
Installation method	Wall mount (mounting bracket supplied)
Flash memory	120 images
External SD card	Max.32GB

Doorphone (VL-VA500SX)

Power source	Power supplied by the main monitor

VL-VBN500SX Smart Door Bell

**Panasonic VDP is
cost-effective**

**MRP:
Rs. 6,999/-**

Features:

- 720p resolution real-time video streaming
- Compatible with both iOS and Android
- 7 days of free cloud storage with maximum of 20 videos per day limit
- Smart call-in feature for notification from Smart Door Bell
- Access on remote network via mobile App
- Wi-Fi network support
- Up to 8 mobile application users supported
- Built-in PIR sensor for motion detection
- External storage supported up to 32 GB
- Built-in microphone and speaker
- Lens: 1/3" 2.8mm@f2.0, angle 100 degree
- Dimensions: 102 x 102 x 36 mm

One year onsite warranty*

Remote Access

Real-time alerts on your smartphones for anyone visiting your premises. Alerts on both local and remote network.

PIR Detection

It can also send a notification for any motion detection in front of the device.

IP Rating

The Smart Door Bell is rated IP 54.

SMARTCLOUD AI

BROCHURE 2020

CLOUD BASED TECHNOLOGY

Onetouch welcomes you to the next generation of Smart Cloud AI based Video Door Intercom with built in communication and security. Smart Video Door Intercom opens up a new paradigm in the Video Door Phone industry by providing a Wirefree network connection via internet to view and talk to your visitor from a smartphone. Onetouch Smart Cloud AI product portfolio covers every Intercom need, from simple point to point intercom systems to complex multi-apartment Video integrated solutions over Cloud.

SMARTCLOUD AI PRODUCT LANDSCAPE

We believe in delivering: Communication and Security for Building and People in simplest and at most affordable value.

VIDEO ENTRY STATION OT-IP-LP-C9

- Face recognition
- QR code authentication
- Bluetooth unlocking
- Biometric authentication
- Apartment SIP dialing
- Integration with boom barrier / flap barrier
- EM Lock integration
- Video Door Phone integration
- IP 65 water resistant
- Smartphone integration

MULTI-APARTMENT SOLUTION

The Multi Apartment over Cloud Solution provides a large scale Wirefree system with rich functionality such as video intercom, video Surveillance and intrusion detection. Onetouch AI Mobile APP can be used for verifying visitor over video call and can also be used for making intercom call to neighbours and intrusion alarm alerts.

The Unmanned Guard Video Entry Station covers various Contactless and Non Contactless authentication methods like (Face Recognition, Biometric, RFID card, QR Code, Bluetooth, SIP Video Dialing and password) to provide maximum security.

The property manager can manage community devices; alarm alerts; group messaging and access control using the Onetouch Management Portal.

STANDALONE SOLUTION

Onetouch's Standalone Cloud Kit comes with a Touch Screen Video Door Phone, Video Door Bell, Mobile APP and can be scalable to multiple Indoor & Outdoor devices. The Kit comes complete with a rich set of features such as remote intercom, door control, remote monitoring, Motion Alarm Alerts and notifications pushed to your mobile phone. No matter where you are, no visitor or message will be missed.

Onetouch AI Mobile APP can be used for verifying visitor over video call and can also be used for making intercom call to family members.

The Video Door Phone has a built in 8 Zone Alarm Panel so you can connect any conventional sensor like Motion sensor or Gas Leak Detector. In case of alarm, it will send live alert on Video Door Phone and Mobile APP.

VIDEO ENTRY STATION

FOR VISITOR MANAGEMENT

This SIP based Video Entry Station has Face, QR, Biometric, Mifare Card and Video Calling facility, so its multipurpose and can be integrated with Flap Barrier for pedestrian and Boom Barrier for Vehicles.

All Residents, Housekeeping, Maids and Drivers Shall register their Face at the Society Office so they can authenticate themselves at main gate using their face credential and unlock flap barrier gate automatically.

For Visitors like food or shopping delivery, Guard will make Video Call and take confirmation from Apartment owner and issue the QR Credentials or press manual button to unlock the barrier gate for contactless entry.

VIDEO ENTRY STATION

FOR VEHICLE MANAGEMENT

QR CODE

The Video Entry Station has Wiegand Port to directly integrate with UHF Reader. Apartment Owner Vehicle's shall be pre registered with the UHF Tag, already pre tagged in each vehicle. On Authorisation of UHF Tag with UHF Reader, the Video Entry Station will automatically open the Boom Barrier.

A pre Authenticated Bluetooth profile can also be given to Apartment Owners Mobile APP and they can show their mobile in front of the video entry station to open the barrier gate.

Visitors shall have QR code issued to them prior to visit to the society from Apartment owners Mobile APP. On showing the QR Code, video entry station panel will open the Barrier Gate.

UHF READER
INTEGRATION

ALLOW YOUR LOVED ONES TO ENTER EASILY

Onetouch Smartcloud AI can integrate with Digital Door Lock and wirelessly unlock it using touch screen Video Door Phone or Mobile App.
